Summary

Detail-oriented and passionate Developer with over two years of experience creating dynamic, responsive web applications. Skilled in HTML, CSS, JavaScript, and popular frameworks like React, as well as proficient in leveraging the Power Platform suite (Power Apps, Power Automate, and Power BI) to streamline business solutions. Proven ability to collaborate in a team environment, meet deadlines, and consistently improve user experiences. Strong communicator and fast learner, dedicated to continuous skill development and delivering high-quality results.

Experience

Yaltopia Tech   **January 2021 - Current**
Mid-Level Frontend Developer   Ayat

🔗 https://tech.yaltopia.com/

- Built responsive web applications using **React.js** and **Tailwind CSS**.
- Optimized the mobile interface for better usability and accessibility.
- Managed API integrations with **Axios** for ERP data synchronization.

Private Client   **November 2023 - current**
Power Platform Developer   Remote(US)

- Managed site collections, including creating, configuring, and administering team sites, communication sites, and hub sites to support different business departments and projects.
- Developed and deployed custom applications using Power Apps, enhancing business workflows and automating tasks like data entry, approvals, and reporting.
- Implemented Power Automate to automate repetitive tasks and streamline cross-departmental workflows, significantly reducing manual intervention and improving operational efficiency.
- Designed and implemented interactive, user-friendly Power BI dashboards and reports, providing actionable insights and key performance indicators (KPIs) for stakeholders across various departments

Certifications

Meta Frontend Developer   **January 2023**
